III. Brief discussion on what “health home means”

There was a brief discussion on what health home means as discussed in the resource handout for Outcome 2 provided by The California Endowment. It was summarized as holistic health practices through a network of services provided to the family that takes care of their mental and physical well being. A question on privacy and flow of information to offer such holistic services was raised. There was also a question raised on how this network would be managed between different providers.

IV. Prioritizing Strategies

The primary goal of the meeting was to align the AHC MT vision with the data from the house meetings. The groups were asked to populate the ICA matrix using consensus and identify areas where they found a match between different components of the vision statement coinciding with the residents needs. After the completion of the process, the group was in disagreement whether this exercise was correct way to prioritize strategies and the decision to prioritize was postponed for the next meeting.
