To Whom It May Concern:

San Diego Family Care is writing in support of the planning grant being submitted to The California Endowment by Mid-City CAN on behalf of the community of City Heights. We are very committed to the planning process and believe that a wide range of input and careful planning will ultimately result in a significantly improved quality of life for the entire City Heights community.

We are committed to attending planning meetings and will commit ongoing staff time to participate in the process.

We certainly can offer some copying/printing services at no cost, depending upon the volume. We can also try to help with some data analysis.

Please keep us informed regarding how we can best be of help as the planning continues.

Sincerely,

Roberta L. Feinberg, M. S.  
Chief Executive Officer
